

## DATA SHEET

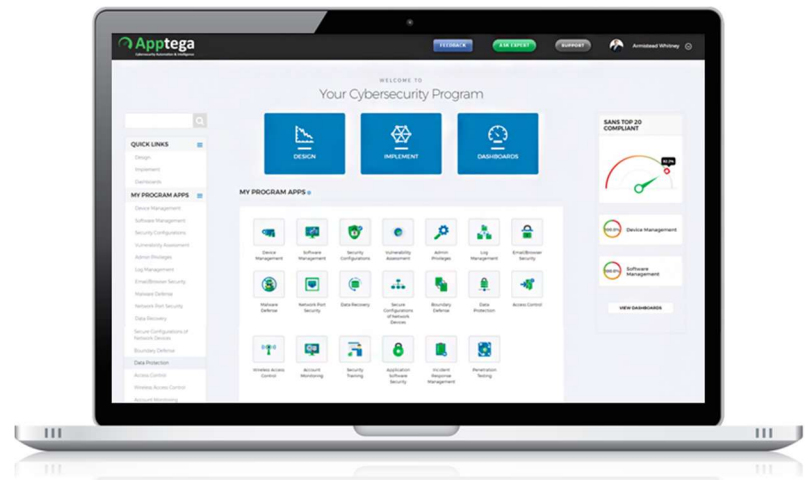

# APPTEGA QUICKSTART PROGRAM

## Accelerate Cybersecurity Program Adoption

Apptega's QuickStart program, led by certified CISO consultants, will migrate all of your data – assessments, policies, plans, projects, tasks and other supporting evidence into the appropriate controls in Apptega creating a fully functioning program with executive dashboards and scoring across all controls.

The program includes:

- A review of your compliance objectives, security initiatives, existing documentation and internal “due dates” (including next audit schedules)
- Perform three (3) two-hour interactive working sessions to migrate your cybersecurity and compliance data into each control in the framework
- Create real-time scoring for each control on prior assessments and via the company's internal knowledge
- Create a set of tasks in the platform to drive future activity
- Conduct review sessions with your leadership to view the completed dashboards and program data
- Discuss program gaps and provide high-level recommendations

The Apptega QuickStart is \$3,500 USD for this one-time engagement and is in addition to the Apptega platform subscription. Additional projects beyond the scope can be directly sourced with the independent consultants.
